

EPL Dealer Portal Indirect Lending Solution

EPL Dealer Portal is a complete Internet-based solution for managing indirect lending, allowing credit unions to easily and effectively generate and process indirect lending applications. This premier dealer lending solution allows one or more lender participants to offer their loan products to many different dealers from a single Internet source that includes the most versatile automated credit decisioning system in the industry. EPL Dealer Portal is powered by Indirect Lending Technologies' Dealer Indirect Lending and Leasing System, or DILLS.

Key Features

- Versatile automated loan decisioning system that can be customized to fit any lender's criteria.
- Real-time dealer communications.
- Online credit bureau reports.
- Integrates with online version of N.A.D.A Official Used Car Guide.
- Optional integration with DealerTrack and RouteOne dealer application systems.
- Customized forms pre-filled for printing at the dealership.
- Tracks dealer commissions.
- Internet-based system. No new software or hardware required.
- Secure user login with usage log and tracking.

Benefits

- Minimize indirect lending response times.
- Enables loan officers to be more efficient.
- Powerful management reports assist in the evaluation and tracking of a credit union's indirect lending program.
- Allows your credit union to provide the best possible service to borrowers and dealers.
