

Ad-Hoc Reporting – Oracle Discoverer

EPL has integrated Oracle Discoverer into its core system. Discoverer is an intuitive ad-hoc query, reporting, and analysis tool that empowers users at all levels of your credit union to gain immediate access to information. Your credit union's staff and management will value using Discoverer for looking at data because users can use existing reports, modify reports or create their own reports without programming or involvement from the IT staff. Oracle Discoverer gives credit unions an easy, non-technical, and secure way to analyze data.
